**Certificate**  
**OCT 23 2006**  
**of Correction**

Sir:

Grantee of the subject Patent requests the issuance of a certificate of correction in the form as set forth in the draft certification submitted herewith to correct errors in the claims.

Specifically, upon submission of an Amendment when submitting the original application, there were two clerical errors, the first in claim 1 and the second in claim 16.

In claim 1, in the eleventh line of the claim printed in the patent, the word "pin" was inadvertently omitted and must be inserted between "actuating" and "and", with the element "actuating pin" having antecedent basis in the preamble at line 2 of the printed patent.

In claim 16, in the third line of the printed patent, the element "threaded cap" was inadvertently referred to as "cap threaded" and requires correction.

The Examiner during prosecution also did not notice the error and the patent issued. The corrections are noted on the concurrently filed PTO/SB/44.. As these errors were both typographical and clerical, no new matter is being added by such amendments.
